

KRINNER INNOVATIONS 2020

KRINNER FOCUSES ON FUTURE AND ENVIRONMENT

Preliminary draft (may differ from final design)

KRINNER *Green Line M*

Item No.	94129
EAN	4011972941297
Purchasing Unit	60
For trees up to approx.	250 cm
Trunk-Ø approx.	12,0 cm
Net weight	5,0 kg
Tree Stand Ø	36,0 cm
Water reservoir	3,5 L

Max. 2,5 m

Single-Cable-
Operation

Patented
Safety belt

Max. 12 cm

3,5 L Water
Reservoir

adjustment
claws

100 %
Recycled Plastic

Made in Germany
Guaranteed Quality since 1990

Krinner is a Bavarian company with a history of inventions. To mark its 30th anniversary, the company is supplementing its attractive range with the world's first Christmas tree stand made from recycled plastic. The new KRINNER Green Line M is sustainably manufactured in Lower Bavaria and therefore contributes to the responsible use of natural resources.

The KRINNER Green Line M thus reflects our belief in sustainable action and, as a result, a better future.

„We are proud of our quality items „Made in Germany“. For our customers this crucial quality feature distinguishes our brand. The significantly shorter transport routes through our production in Lower Bavaria does also improve the ecological balance“, says Klaus Krinner.

For 2020, Krinner is planning to process more than 200 tonnes (!) of recycled material. This corresponds to around 10 million plastic bottles.
